List of Sections

D3 Tutorial Part 1 - From Zero to Binding Data

1. Why Data Visualizations
   - A picture is worth 1000 words
   - A Famous Data Visualization
   - Data - now and in the future
   - Data is the new Oil

2. Why build Data Visualizations with D3.js
   - What is D3.js
   - Who develops D3.js
   - Why use D3.js
   - When you should use D3.js
   - Where is D3.js used

3. The Data Visualization Process
   - The Ben Fry Visualizing Data Process
   - Acquire
   - Parse
   - Filter
   - Mine
   - Represent
   - Refine
   - Interact

4. Basic Building Blocks
   - Modern Browsers
   - HTML
   - CSS
   - JavaScript
   - Document Object Model (DOM)
   - Scalable Vector Graphics (SVG)
   - Web Inspector

5. D3.js First Steps
   - HTML Setup
   - D3.js Setup
   - Source File Setup Test
   - JavaScript Console Setup Test

6. Adding a DOM element
   - Basic Example
   - D3.js Select Method
   - D3.js Append Operator

7. Adding an SVG element
   - Basic Example
   - D3.js Legibility
   - D3.js Style Operator
   - D3.js Chain Syntax
   - Selections as JavaScript Variables

8. Binding Data to DOM Elements

- Basic Example
- D3.js SelectAll Method
- D3.js Data Operator
- D3.js Virtual Selections (Thinking with Joins)
- D3.js Enter Method
- D3.js Append Operator Revisited
- D3.js Text Operator
- Where did the Data go?
- D3.js Data Operator Revisited
- Basic Example Revisited

9. Using Data Bound to DOM Elements
   - Basic Example
   - D3.js Text Operator Revisited
   - JavaScript Functions in D3.js Operators
   - Variables Available inside D3.js Operators

D3 Tutorial Part 2 - Using Data to Create Data Visualizations

10. Creating SVG Elements Based on Data
    - The Goal
    - Create an SVG Element to Hold SVG Elements
    - SVG Circle Elements
    - Bind Data to SVG Circles
    - Use Bound Data to Alter SVG Circles
    - Styling SVG Elements Based on Data

11. Using the SVG Coordinate Space
    - The Goal
    - Mathematical / Graph Coordinate Space
    - SVG Coordinate Space
    - .append('svg') as a Coordinate Space
    - Position SVG Elements in the SVG Coordinate Space
    - Create an SVG Element to Hold SVG Elements
    - Bind Data to SVG Circles
    - Use Bound Data to Alter SVG Circle Coordinates
    - Styling SVG Elements Based on Data Revisited

12. Data Structures D3.js Accepts
    - The Goal
    - What we have seen thus far
    - D3.js Selections are Arrays
    - Loading External Data Resources
    - JSON
    - Array of JSON Objects

13. Using JSON to Simplify Code
    - The Goal
    - Previous Example of Three Circles
    - Bind JSON Objects to the __data__ Attribute
    - Use Bound JSON Objects to Alter SVG Elements

14. SVG Basic Shapes and D3.js
    - The Goal
    - Drawing an SVG Circle using D3.js
    - Drawing an SVG Rectangle using D3.js
    - Drawing an SVG Ellipse using D3.js
    - Drawing an SVG Straight Line using D3.js
    - Drawing Polyline & Polygon SVG Basic Shapes using D3.js

15. SVG Paths and D3.js
    - The Goal
    - The Shape to Make All Shapes
    - SVG Path Example

- SVG Path Mini-Language
- D3.js Path Data Generator Line Example
- D3.js Path Data Generators

16. Dynamic SVG Coordinate Space
    - The Goal
    - Three SVG Rectangle Example
    - Manually Adjusting SVG Container Space
    - Dynamically Adjusting SVG Container Space
    - The Finished Product

17. D3.js Scales
    - The Goal
    - D3.js Scales
    - A Numerical Example
    - D3.js Scale Linear
    - D3.max
    - D3.min
    - Other D3.js Scales

18. SVG Group Element and D3.js
    - The Goal
    - SVG Group Element
    - Grouping SVG Elements Together
    - Transforming SVG Elements Together (Part 1)
    - SVG Transform Attribute
    - Transforming SVG Elements Together (Part 2)
    - SVG Transform as a Coordinate Space Transformation
    - Grouping SVG Elements with D3.js
    - Transforming SVG Elements Together with D3.js

19. SVG Text Element
    - The Goal
    - SVG Text Element
    - Adding an SVG Text Element
    - SVG Text Element and D3.js

20. D3.js Axes
    - The Goal
    - D3.js Axis Component
    - Why We Add Axes
    - Horizontal Axis and Vertical Axis
    - Scale of Axis
    - Generating a D3.js Axis
    - Calling the D3.js Axis Function
