

TensorFlow Hub is a repository of trained machine learning models.

TensorFlow Hub is a repository of trained machine learning models ready for fine-tuning and deployable anywhere. Reuse trained models like BERT and Faster R-CNN with just a few lines of code.

(<https://www.tensorflow.org/hub/overview>) (<https://www.tensorflow.org/hub/overview>)

See the guide

Learn about how to use TensorFlow Hub and how it works.

(<https://www.tensorflow.org/hub/tutorials>) (<https://www.tensorflow.org/hub/tutorials>)

See tutorials

Tutorials show you end-to-end examples using TensorFlow Hub.

See models (<https://tfhub.dev>)

Find trained TF, TFLite, and TF.js (<https://tfhub.dev>) models for your use case.

```
!pip install --upgrade tensorflow_hub
```

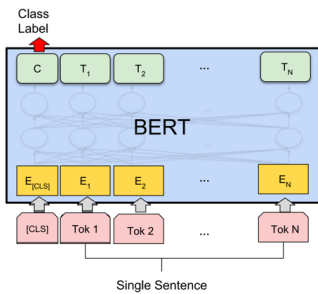

```
import tensorflow_hub as hub
```

```
model = hub.KerasLayer("https://tfhub.dev/
embeddings = model(["The rain in Spain.",
                    "mainly", "In the pla
```

```
print(embeddings.shape)  #(4,128)
```

Models

Find trained models from the TensorFlow community on [TFHub.dev](https://tfhub.dev) (<https://tfhub.dev>)

(https://tfhub.dev/tensorflow/bert_en_uncased_L-12_H-768_A-12/3)

BERT

(https://tfhub.dev/tensorflow/bert_en_uncased_L-12_H-768_A-12/3)

Check out BERT for NLP tasks including text classification and question answering.
