# Week 3 Lab Instructions (RStudio)

[↗ Practice with Lab Sandbox](#)

## Install and load a new R package:

We will use package GGally in this lab. If you haven't done so in Week 1 & 2 lab, launch RStudio, add the following commands in the **Console**:

```
1 install.packages("GGally")
2 library(GGally)
```

## Download and Knit the lab:

Download the R Markdown (Rmd) file, open it in RStudio, and click on Knit. This document contains the instructions for the lab. **IMPORTANT:** Use right-click, then save link as to save the below R Markdown file. If Chrome doesn't work, switch to Firefox or other browsers when downloading the file. You must download and Knit this file and be able to view the instructions in it to complete the this week's Lab, so make sure to complete these steps before starting the lab.

**multiple\_regression\_Coursera**

RMD File

As you go through the contents of the lab instructions document you will encounter multiple choice questions, make sure to **submit your answers** to those questions in the lab section (next item) to get credit. The ones marked with Exercise are for your own practice -- you don't need to submit your answers to them.

## If you have not completed Week 1 & 2 Lab:

You will need to first complete the following before you can work on Week 3 Lab:

## Install R and RStudio:
