About Statistics with R Specialization

Coursera Specialization in General:

To know more about the how Coursera specializations work, please see a list of frequently asked question on Coursera's [Help Page](#). If you have questions about specializations in general, you may leave feedback to Coursera on their forum.

Master Statistics with R Specialization:

To learn more about Master Statistics with R specifically, please see the [specialization page](#) about the course titles, descriptions, and outlines if the courses have been launched.

Inferential Statistics Course:

To understand what this course: Inferential Statistics is about, please refer to the course [description page](#) for more details.

The structure of this course follows: two to four lessons in each week (module) with video and reading content, the last lesson usually contains assessments, including suggested exercises from the [OpenIntro Statistics, 3rd edition](#) (a free online introductory statistics textbook co-authored by Dr. Cetinkaya-Rundel), a practice quiz, a graded quiz, and a lab, in which you will be using R to run some data analysis and answer questions.
