Frequent Itemsets and Association Rules

Activity Strategy

Activities

The best activity is not just one single activity! We have carefully designed this course to offer you a variety of engaging activities:

Instructor-led demonstrations

You will watch instructional videos where the instructor demonstrates various concepts. Afterward, you can replicate the demo and experiment with it to enhance your understanding. Remember, it's not just about reading; hands-on experience is crucial!

Guided Case Studies

You'll have the opportunity to delve deeper into case studies to witness the practical applications of the knowledge and methods taught. Don't limit yourself to reading; actively participate by running these case studies too!

Unguided Case Studies

In addition, you'll be provided with datasets to practice case studies on your own. This allows you to explore areas that interest you the most and apply your knowledge independently.

Exploration Exercises

As part of your learning journey, you can select a dataset that piques your curiosity and explore it in your preferred direction. Engage in discussions and collaborate within our community to enhance your learning experience.

Get ready to enjoy the learning process and let's embark on this exciting journey together!
