TensorFlow 2 Detection Model Zoo

 TensorFlow 2.2  Python 3.6

We provide a collection of detection models pre-trained on the [COCO 2017 dataset](#). These models can be useful for out-of-the-box inference if you are interested in categories already in those datasets. You can try it in our inference [colab](#)

They are also useful for initializing your models when training on novel datasets. You can try this out on our few-shot training [colab](#).

Please look at [this guide](#) for mobile inference.

Finally, if you would like to train these models from scratch, you can find the model configs in this [directory](#) (also in the linked `tar.gz` s).
