lazy-load database /Library/Frameworks/R.framework/Versions/3.4/Resources/library/n2o/R/n2o.rdb is corrupt

I also tried to install sparkling water during this week, not sure if it also causes the corruption.

1) What version of H2O are you using: h2o\_3.18.0.2.  
2) Specify the type of machine your using: i.e. OS X 10.13.3  
3) Specify what language you are working in and what version: R version 3.4.3; R studio Version 1.1.414

hi,

the lazy load database issue usually means you just need to restart rstudio.
