ER	Frequency	Percent	Cumulative Frequency	Cumulative Percent
2	5	2.84	5	2.84
3	99	56.25	104	59.09
4	66	37.50	170	96.59
5	6	3.41	176	100.00
Frequency Missing = 37				

I created three new variables using the polityscore, female employment rate and employment rate. Poltiscore is under Poltiscoregroup, female employment rate is under FE, and employment rate is ER.

For Polity Score most of the countries with scores fell into groups 1 & 4. With 36.15% for group 1 and 42.25% for group 4. Group 1 includes countries with polity score of -5 to -10. Group 4 includes countries with polity scores of 5 to 10.

For Female Employment Rate 45.07% of the countries fell into group 3. Group 3 included countries with female employment rates equal to and greater than 40% but less than 60%.

For Employment Rate there were no employment rates recorded below 20% therefore group 1 does not show. 56.25% of countries fell into group 3 which included countries with employment rates equal to and greater than 40% but less than 60%.
