- Save both of these files in the same directory (where you are calling iPython notebook from) and unzip the data file.
- Open the notebook using IPython Notebook.
- Note that this is the same notebook used in the programming assignment for this module.
- Note that there is a bug in GraphLab Create 1.6.0, where the scatter plots don't show up in the notebook. Please upgrade to a new version, if you have 1.6.0.
