

# Tableau 11, Part 2

The fabulous limit laws

The law of large numbers in continuous spaces, computation à la Monte Carlo

---

# Tableau 11, Part 2

The fabulous limit laws

The law of large numbers in continuous spaces, computation à la Monte Carlo

---

# We will need the continuous analogues of:

---

# We will need the continuous analogues of:

---

- ❖ Expectation and variance for variables governed by densities

# We will need the continuous analogues of:

---

- ❖ Expectation and variance for variables governed by densities
- ❖ Chebyshev's inequality on the likely deviation of a continuous chance variable from its expectation

# We will need the continuous analogues of:

---

- ❖ Expectation and variance for variables governed by densities
- ❖ Chebyshev's inequality on the likely deviation of a continuous chance variable from its expectation
- ❖ Independent trials and variables in the continuum

# We will need the continuous analogues of:

---

- ❖ Expectation and variance for variables governed by densities
- ❖ Chebyshev's inequality on the likely deviation of a continuous chance variable from its expectation
- ❖ Independent trials and variables in the continuum
- ❖ The subtle dance of additivity of expectation and variance
