

Climate Change Survey

* Required

Directions

You will be asked four questions below. Before answering, you should flip a fair coin. If the coin lands heads, you answer the question truthfully based on your own beliefs. If the coin lands tails, you select the answer "no" irrespective of your personal views.

1. Do you feel threatened by the effects of global warming / climate change?

*

- ☐ Yes
☒ No

*2. Do you believe climate change is being worsened by man-made efforts, and that changing your habits can help reduce the rate of climate change? **

- ☒ Yes
☐ No

*3. Do you believe that the ozone layer is thinning due to ozone-depleting substances like CFCs which are released into the atmosphere? **

Ozone thinning leads to increased exposure to UV rays, which are known to cause skin cancer and damage certain species of plants and animals.

- ☐ Yes
☒ No

*4. Do you believe the arctic ice caps are melting due to global temperature increases? **

The melting of polar ice caps would cause an increase in sea level. Scientists predict as much as a three-foot rise in sea level by the year 2100.

- ☐ Yes
- ☒ No
