

OEM USB Drivers

If you are developing on Windows and would like to connect an Android-powered device to test your applications, then you need to install the appropriate USB driver. This document provides links to the web sites for several original equipment manufacturers (OEMs), where you can download the appropriate USB driver for your device. However, this list is not exhaustive for all available Android-powered devices.

If you're developing on Mac OS X or Linux, then you probably don't need to install a USB driver. To start developing with your device, read [Using Hardware Devices \(/tools/device.html\)](#).

The Google USB Driver is **required for Windows only** in order to perform [adb \(/tools/help/adb.html\)](#) debugging with any of the **Google Nexus devices**. The one exception is the Galaxy Nexus: the driver for Galaxy Nexus is distributed by **Samsung** (<http://www.samsung.com/us/support/owners/product/GT-I9250TSGGEN>) (listed as model GT-I9250TSGGEN).

Installing a USB Driver

First, find the appropriate driver for your device from the [OEM drivers \(#Drivers\)](#) table below.

Once you've downloaded your USB driver, follow the instructions below to install or upgrade the driver, based on your version of Windows and whether you're installing for the first time or upgrading an existing driver.

Tip: When you finish the USB driver installation, see [Using Hardware Devices \(/tools/device.html\)](#) for other important information about using an Android-powered device for development.

[Develop](#) > [Tools](#) > **OEM USB Drivers**

Caution: You may make changes to android_winusb.inf file found inside usb_driver\ (for example, to add support for other devices), however, this will lead to security warnings when you install or upgrade the driver. Making any other changes to the driver files may break the installation process.

Windows 7

To install the Android USB driver on Windows 7 for the first time:

1. Connect your Android-powered device to your computer's USB port.
2. Right-click on *Computer* from your desktop or Windows Explorer, and select **Manage**.
3. Select **Devices** in the left pane.
4. Locate and expand *Other device* in the right pane.
5. Right-click the device name (such as *Nexus S*) and select **Update Driver**.
6. Select **Browse my computer for driver software** and click **Next**.
7. Click **Browse** and locate the USB driver folder. (The Google USB Driver is located in `<sdk>\extras\google\usb_driver\`.)
8. Click **Next** to install the driver.

Or, to *upgrade* an existing Android USB driver on Windows 7 with the new driver:

1. Connect your Android-powered device to your computer's USB port.
2. Right-click on *Computer* from your desktop or Windows Explorer, and select **Manage**.
3. Select **Device Manager** in the left pane of the Computer Management console.
4. Locate and expand *Android Phone* in the right pane.
5. Right-click on *Android Composite ADB Interface* and select **Update Driver**.
6. Select **Install from a list or specific location** and click **Next**.
7. Select **Search for the best driver in these locations**; un-check **Search removable media for drivers**; click **Include this location in the search**.
8. Click **Browse** and locate the USB driver folder. (The Google USB Driver is located in `<sdk>\extras\google\usb_driver\`.)
9. Click **Next** to upgrade the driver.

Windows Vista

NDK

To install the Android USB driver on Windows Vista for the first time:

ADK

1. Connect your Android-powered device to your computer's USB port. Windows will detect the device and launch the Found New Hardware wizard.
2. Select **Locate and install driver software**.
3. Select **Don't search online**.
4. Select **I don't have the disk. Show me other options**.
5. Select **Browse my computer for driver software**.
6. Click **Browse** and locate the USB driver folder. (The Google USB Driver is located in `<sdk>\extras\google\usb_driver\`.) As long as you specified the exact location of the installation package, you may leave **Include subfolders** checked or unchecked—it doesn't matter.
7. Click **Next**. Vista may prompt you to confirm the privilege elevation required for driver installation. Confirm it.
8. When Vista asks if you'd like to install the Google ADB Interface device, click **Install** to install the driver.

Or, to *upgrade* an existing Android USB driver on Windows Vista with the new driver:

1. Connect your Android-powered device to your computer's USB port.
2. Right-click on *Computer* from your desktop or Windows Explorer, and select **Manage**.
3. Select **Device Manager** in the left pane.
4. Locate and expand *ADB Interface* in the right pane.
5. Right-click on *Android Composite ADB Interface*, and select **Update Driver Software**.
6. When Vista starts updating the driver, a prompt will ask how you want to search for the driver software. Select **Browse my computer for driver software**.
7. Click **Browse** and locate the USB driver folder. (The Google USB Driver is located in `<sdk>\extras\google\usb_driver\`.) As long as you specified the exact location of the installation package, you may leave **Include subfolders** checked or unchecked—it doesn't matter.
8. Click **Next**. Vista might prompt you to confirm the privilege elevation required for driver installation. Confirm it.
9. When Vista asks if you'd like to install the Google ADB Interface device, click **Install** to upgrade the driver.
