Introduction to Bayesian Statistics

Bayesian Inference with MCMC

Introduction to PyMC3 for Bayesian Modeling and Inference

Aug 2, 2021

Sandipan Dey

has successfully completed the online, non-credit Specialization

Introduction to Computational Statistics for Data Scientists

The objective of this specialization is to introduce Computational Statistics to aspiring or new data scientists. The attendees will start off by learning the the basics of probability, Bayesian modeling and inference in Course 1. This will be followed by a series of lectures on how to perform inference approximately when exact calculations are not viable in Course 2. Finally, PyMC3 will be introduced along with its application to some real world scenarios.

Dr. Srijith Rajamohan Sr. Developer Advocate (Data Science) Databricks Inc.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
