Peer Assessments (https://class.coursera.org/datavisualization-001/human_grading/)
/ Programming Assignment 2 Submission

Help Center (https://accounts.coursera.org/i/zendesk/courserahelp?return_to=https://learner.coursera.help/hc)

Submission Phase

1. Do assignment ☑ (/datavisualization-001/human_grading/view/courses/973956/assessments/14/submissions)

due in 2day 11h

Evaluation Phase

2. Evaluate peers ☐ (/datavisualization-001/human_grading/view/courses/973956/assessments/14/peerGradingSets)

3. Self-evaluate 🔒 (/datavisualization-001/human_grading/view/courses/973956/assessments/14/selfGradingSets)

Results Phase

4. See results 🔒 (/datavisualization-001/human_grading/view/courses/973956/assessments/14/results/mine)

Submission from: Student 2

Before submitting your visualization image, make sure you review the full instructions page (https://class.coursera.org/datavisualization-001/wiki/view?page=Programming_Assignment_2).

Upload your visualization image below.

Alongside your visualizations, feel free to include a paragraph that helps explain your submission. A few

questions that your paragraph could answer:

1. What is the data that you chose? Why?
2. Did you use a subset of the data? If so, what was it?
3. Are there any particular aspects of your visualization to which you would like to bring attention?
4. What do you think the data, and your visualization, shows?

---

1. Citation: Lada A. Adamic and Natalie Glance, "The political blogosphere and the 2004 US Election", in Proceedings of the WWW-2005 Workshop on the Weblogging Ecosystem (2005).

   Data on political leaning comes from blog directories as indicated.

   Reason for selection: I'm interested in election polls

2. Yes. I used the data attached in the PS.

3. Blogs leaning towards liberals are indicated by "Pink color nodes"
   Blogs leaning towards conservatives are indicated by "Green color nodes"

   Blogs leaning towards liberals are grouped together with the pink directed edges indicating which blog pointed to which other blog

   Blogs leaning towards conservatives are grouped together with the green directed edges indicating which blog pointed to which other blog

   Blog leaning towards liberals but pointing to the blog leaning towards conservatives and vice-versa are indicated by "Gray color edges" which act as connecting edges between two communities

   Blog names are indicated with "Red Color"(where each node indicates a blog)

   Number of crossings of the edges are kept as minimum as possible

4. Interaction(through incoming and outgoing links) between blogs that lean towards liberals and conservatives with appropriate groupings and colorings.

PS: Data used

Overall evaluation/feedback

Proximate Layout

How well are related items placed near each other?

Poor (1-2 points)	Fair (3 points)	Good (4 points)	Excellent (5 points)
Relationship between items cannot be discerned because of poor layout.	Major problems with the layout, leading to many long and/or overlapping edges.	Minor problems with the layout, resulting in one or two distractingly long edges.	Related items are placed near each other.

Instructions: Select a score below that corresponds to the rating above that best describes the work you reviewed.

4: Good ▼

Design of the visualization

Does the visualization effectively utilize the assignment of variables to elements and design of a visualization described in Week 2?

Poor (1-2 points)	Fair (3 points)	Good (4 points)	Excellent (5 points)
Relationship between items cannot be discerned because of poor element and/or design choices.	Major problems with some elements and or design choices that interferes with the display of the data.	Minor problems with some elements and or design choices that distracts from the display of the data.	Visualization effectively uses elements and design to display the data.

Instructions: Select a score below that corresponds to the rating above that best describes the work you reviewed.

4: Good ▼

Contest

How interesting is the result. Does this represent an interesting choice of data and/or an interesting way to display the data?

Poor (1-2 points) Fair (3 points) Good (4 points) Excellent (5 points)

Misleading   Boring   Not boring   Interesting

Instructions: Select a score below that corresponds to the rating above that best describes the work you reviewed.

3: Fair ▼

Optionally, you may give your peers some feedback or comments on their submissions.
