Information on Peer Reviews

Peer Review is a critical part of this course. As you work on Peer Reviews throughout the course, please keep the following expectations and guidelines in mind:

- Peer Reviews are due **3 days before the end of the session**. This required deadline is in place so that there is enough time at the end of the session for your peer reviews to accrue all the required reviews they need. Keep this in mind as you work through the course.

- These assignments provide crucial professional practice. Think of your peers as your colleagues. Craft your responses to communicate your work in a way that they will understand.

- When you give feedback on your peers' work, practice reviewing the way you would for colleagues in a real-world setting.

- Some courses in the MS-DS program have chosen to allow reviewers to remain anonymous. However, in the spirit of thinking of your peers as colleagues, some courses do allow learners to see who reviewed their work. Please refer to the assignment details or ask your Course Facilitator if you have questions.

- Continue building your abilities to make sense of other people's code and visualizations throughout the course.

- You are responsible for reviewing thoroughly.

- Plagiarism expectations for the course still apply even though you can resubmit the peer review after accessing the rubric.
  - **Copying the provided rubrics to use as your own work is considered plagiarism** and will have serious repercussions
  - **Copying other students' work is considered plagiarism** and will have the same repercussions

✓ **Completed**
