# Peer-graded Assignment: Assignment 7: Open Science

Submit by July 16, 11:59 PM PDT

Important Information

It is especially important to submit this assignment before the deadline, July 16, 11:59 PM PDT, because it must be graded by others. If you submit late, there may not be enough classmates around to review your work. This makes it difficult - and in some cases, impossible - to produce a grade. Submit on time to avoid these risks.

Instructions

Discussions

The goal in this assignment is to learn the practical side of pre-registration and data-sharing, in a very small research project, which will be reported in a very short research report. The goal is not to learn how to collect data or analyze data, so we will keep that part to a minimum.

Review criteria   less ⌃

The learning goal in this assignment is the practical side of pre-registration and data sharing. The goal in evaluating this assignment is to check if all steps have been followed as instructed. The goal is *not* to evaluate the quality of the theoretical hypothesis. The goal is *not* to check whether the data analysis has been performed correctly. You are free to make comments about theoretical hypothesis and data analysis, but you should grade the assignment purely based on whether the instructions have been followed.
