Simple applications

Psychic tendencies?

Psychic tendencies?

✤ Guess the face value of a card drawn at random from a 52 card deck. Repeat with replacement for ten draws.

  ✤ What is the probability that you guess two cards correctly?

  ✤ What is the probability that you guess *at least* one card correctly?

Psychic tendencies?

* Guess the face value of a card drawn at random from a 52 card deck. Repeat with replacement for ten draws.

    * What is the probability that you guess two cards correctly?

    * What is the probability that you guess *at least* one card correctly?

* The number of successful guesses is governed by the binomial distribution with $n = 10$ trials, each with success probability $p = 1/52$.

Psychic tendencies?

Guesses: $X_1, X_2, \ldots, X_{10} \sim \text{Bernoulli}(1/52)$

❖ Guess the face value of a card drawn at random from a 52 card deck. Repeat with replacement for ten draws.

  ❖ What is the probability that you guess two cards correctly?

  ❖ What is the probability that you guess *at least* one card correctly?

❖ The number of successful guesses is governed by the binomial distribution with $n = 10$ trials, each with success probability $p = 1/52$.

Psychic tendencies?

Guesses: $X_1, X_2, \ldots, X_{10} \sim \text{Bernoulli}(1/52)$

Successful guesses: $S_{10} = X_1 + X_2 + \cdots + X_{10} \sim \text{Binomial}(10, 1/52)$

$$P\{S_{10} = k\} = b_{10}(k; 1/52) = \binom{10}{k} \left(\frac{1}{52}\right)^k \left(1 - \frac{1}{52}\right)^{10-k}$$

❖ Guess the face value of a card drawn at random from a 52 card deck. Repeat with replacement for ten draws.

❖ What is the probability that you guess two cards correctly?

❖ What is the probability that you guess *at least* one card correctly?

❖ The number of successful guesses is governed by the binomial distribution with $n = 10$ trials, each with success probability $p = 1/52$.

Psychic tendencies?

Guesses: $X_1, X_2, \ldots, X_{10} \sim \text{Bernoulli}(1/52)$

- ❖ Guess the face value of a card drawn at random from a 52 card deck. Repeat with replacement for ten draws.

  - ❖ What is the probability that you guess two cards correctly?

  - ❖ What is the probability that you guess *at least* one card correctly?

- ❖ The number of successful guesses is governed by the binomial distribution with $n = 10$ trials, each with success probability $p = 1/52$.

Successful guesses: $S_{10} = X_1 + X_2 + \cdots + X_{10} \sim \text{Binomial}(10, 1/52)$

$$P\{S_{10} = k\} = b_{10}(k; 1/52) = \binom{10}{k} \left(\frac{1}{52}\right)^k \left(1 - \frac{1}{52}\right)^{10-k}$$

$$P\{S_{10} = 2\} = \binom{10}{2} \left(\frac{1}{52}\right)^2 \left(1 - \frac{1}{52}\right)^{10-2} = 0.014\cdots$$

Psychic tendencies?

Guesses: $X_1, X_2, \ldots, X_{10} \sim \text{Bernoulli}(1/52)$

❖ Guess the face value of a card drawn at random from a 52 card deck. Repeat with replacement for ten draws.

Successful guesses: $S_{10} = X_1 + X_2 + \cdots + X_{10} \sim \text{Binomial}(10, 1/52)$

$$P\{S_{10} = k\} = b_{10}(k; 1/52) = \binom{10}{k} \left(\frac{1}{52}\right)^k \left(1 - \frac{1}{52}\right)^{10-k}$$

❖ What is the probability that you guess two cards correctly?

❖ What is the probability that you guess *at least* one card correctly?

$$P\{S_{10} = 2\} = \binom{10}{2} \left(\frac{1}{52}\right)^2 \left(1 - \frac{1}{52}\right)^{10-2} = 0.014\cdots$$

$$P\{S_{10} \geq 1\} = 1 - P\{S_{10} = 0\}$$

❖ The number of successful guesses is governed by the binomial distribution with $n = 10$ trials, each with success probability $p = 1/52$.
