

4 Courses

Data Mining in Python

Applied Unsupervised Learning in Python

Network Modeling and Analysis in Python

Applied Information Extraction in Python

UNIVERSITY OF MICHIGAN

Oct 24, 2026

SANDIPAN DEY

has successfully completed the online Specialization

More Applied Data Science with Python

In this Specialization, learners developed their data science analysis skills through the use of applied methods in Python. Learners focused on the ways that Python can be leveraged to extract useful information from complex data sets under different conditions. This Specialization covered data mining, unsupervised learning, network analysis, and information extraction. Upon finishing the Specialization, learners completed 16 Python coding assessments at the level of proficiency expected at the University of Michigan.

Qiaozhu Mei, PhD
Associate Dean for Research and Innovation, Professor of Information, School of Information
Professor of Electrical Engineering and Computer Science, College of Engineering

Kevyn Collins-Thompson, PhD
Associate Professor of Information, Associate Professor of Electrical Engineering & Computer Science
School of Information

Daniel Romero, Ph.D.
Professor of Information, School of Information
Professor of Electrical Engineering and Computer Science, College of Engineering
Professor of Complex Systems, College of Literature, Science, and the Arts

V.G. Vinod Vydiswaran
Associate Professor of Learning Health Sciences, Medical School and Associate Professor of Information
School of Information

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
