

3 Courses

Fundamental MATLAB Programming for AI

Evolutionary Computation and its Applications

Machine Learning and its Applications

Sep 17, 2026

Bo Liu, Professor,
Electrical Engineering

SANDIPAN DEY

has successfully completed the online Specialization

Applied AI for Engineers and Scientists: Foundations

This specialization is designed for scientists and engineers to learn and apply AI techniques effectively and efficiently. The popular and effective AI algorithms are carefully selected and taught in an understandable way with a particular emphasis on using them in real-world science and engineering problems. Besides laying a solid foundation for fundamental concepts, AI techniques that were taught include the genetic algorithm, particle swarm optimization, linear regression, k-nearest neighbors, support vector machines, and artificial neural networks. After taking this specialization, the students can understand the fundamental concepts and working principles of key techniques in evolutionary computation and machine learning, and use them in practice.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
