Introduction to High-Performance and Parallel Computing

Efficient Programming

Parallel Computing with MPI

University of Colorado Boulder

Sep 12, 2026

SANDIPAN DEY

has successfully completed the online Specialization

High-Performance and Parallel Computing

In this specialization, learners developed the foundational skills needed to write efficient, scalable software for high-performance and parallel computing environments. Learners gained practical experience through hands-on C++ programming assignments focused on identifying bottlenecks and implementing parallel solutions. The specialization also introduced modern compute architectures and taught learners how to use the Message Passing Interface (MPI) to develop distributed applications.

Shelley L. Knuth, Ph.D
Associate Director of User Services
Research Computing, University of Colorado Boulder

Dr. Thomas Hauser
Director, Research Computing
Executive Director, Center for Research Data and Digital Scholarship
Adjoint Associate Professor, Universities Libraries
Adjunct Associate Professor, Department of Computer Science
University of Colorado Boulder, 597 UCB, Boulder, CO, 80309

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
